

# The Vactor® 2100i Catch Basin provides all of the 2100i benefits

Improved air flow, operator ergonomics, enhanced safety, smart truck design. The 2100i Catch Basin (CB) has an improved air-routing system that provides an efficient air flow path for both the single-stage and dual-stage fan or a positive displacement blower configuration resulting in outstanding performance and maximum productivity. Ergonomic controls make it the 2100i CB easy to operate and maintain.

For those who want to expand capabilities beyond catch basin cleaning and into vacuum excavation, the hydro excavation package can be selected. Water system and water heater options are available to enhance the hydro excavation performance.

## SYSTEMS & COMPONENTS ON THE 2100i CB INCLUDE:

### Vacuum System

- Single & dual stage fan systems
- 15", 16" & 18" Hg PD blowers

### Boom Options

- 5 x 5
- Rapid Deployment Boom™ (RDB 1015™)
- 10' Telescoping
- 10' Extendable

### Debris Capacity

- 5, 10, 12 & 15 cu. yd. capacity
- 1000, 1300, 1500 gal. capacity

### Water Pump Options

- 10 gpm at 1000 psi (Wash down pump)
- 30 gpm at 3000 psi (Jet Rodder® Pump)
- 40 gpm at 2500 psi (Jet Rodder® Pump)

### Optional Water Heaters

- 400k BTU
- 800k BTU

### Cold Weather Options

- Heated pump cabinet
- Insulated water lines
- Heated & insulated water lines
